

# Storage Spine

Ecologically sustainable – Storage Spine was designed using recyclable materials and processes that support sustainable manufacturing methods. It is supported with a comprehensive stewardship program and will be taken back at the end of its useful life.

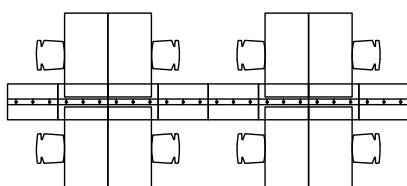

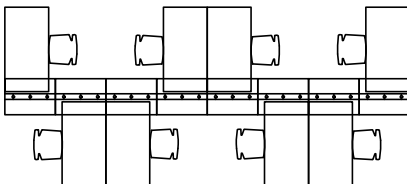

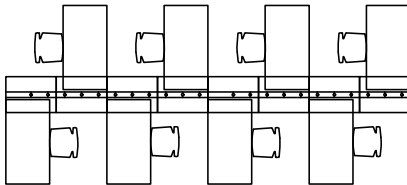

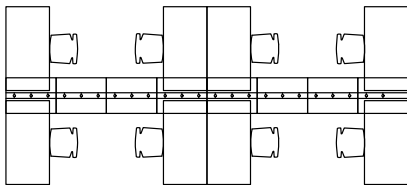

# Storage Spine

The system is based on a structural Storage Spine with attached multi-purpose elevated storage and cantilevered height adjustable desks. Incorporating services reticulation and optional privacy screens giving versatile products that adapt to offices and workstations. Storage Spine is modular giving flexibility when re-configured.
