COLUMNLESS
SAFECARE FLOOR BED

COLUMNLESS SAFECARE FLOOR BED

The Columnless Safecare floor bed is an addition to our range of electric beds. While most low-low beds have bulky end columns, this bed is able to achieve the same results with a lightweight and clean design that eliminates the 'tombstone' look. This allows full view of the patient and creates a friendlier environment. It is also available with a range of head and foot boards.
