Who we are and what we do

Sedus Stoll AG was founded in 1871 and is one of the leading European manufacturers of office solutions. The product range includes seating furniture, such as swivel and visitor chairs, as well as office, conference and contract furniture – all “Made in Germany”.

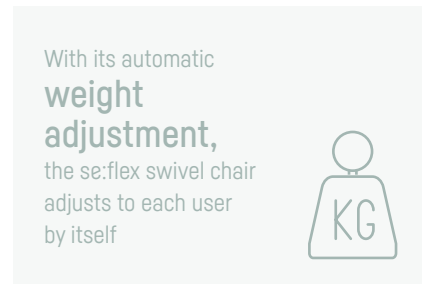

The company headquarters is located in Dogern on the High Rhine in southern Germany. Another production site is in Geseke, North Rhine-Westphalia. Sedus is a company with a long tradition and 150 years of company history that has repeatedly set standards – in terms of ergonomics, manufacturing processes and sustainability. As a synonym for innovation, technology and aesthetics, Sedus constantly enriches the “office world” with new product ideas and contemporary concepts. Sedus puts a strong focus on current trends and changes in the world of work. New organisational structures and forms of work require flexible, aesthetic furnishings and custom-made solutions that enhance collaboration, communication and movement. A particular emphasis is placed on the health and well-being of the users.

Certification for the se:flex

s e : f l e x

Workstations of tomorrow are being developed today

Modern companies are facing ever increasing rental and ancillary expenses. At the same time, increasing digitalisation and networking are resulting in a new approach to work which no longer requires fixed workstations. The consequence: Expensive office spaces are, on average, only occupied for half the time. Many companies are responding to this development and are increasingly opting for smart working solutions characterised by non-territorial workstation concepts. As a consequence, there has been a rise in the number of multi-user workstations which are used by several employees at different times.

ADJUSTS TO EACH USER

Sitting reinvented: one for all

se:flex is a comfortable swivel chair which adjusts automatically to the requirements of the most diverse users, regardless of how tall or heavy they are, without having to make any presettings.

se:flex ensures a pleasant and ergonomic sitting experience right from the start. It also guarantees that users can immediately focus on the job in hand. Whether for individual work, cooperating or communication: the se:flex ideally supports all users in every working situation. The automatic way to sit properly.

Lean forward and focus

Due to the positive tilt of the seat and backrest, the se:flex follows these movements.

Sit upright and concentrate:

A perfectly balanced backrest pressure ensures ideal support at all times.

Lean back and relax

The large opening angle and the armrests which follow the chair's movements guarantee a wonderfully relaxed posture.

FORM AND FUNCTION

Fits like a glove

Those who work on projects at multi-user workstations, need to think about many different things. However, certainly not about how they can correctly adjust their swivel chair. The se:flex simply does it automatically: The user's body weight and proportions regulate the backrest pressure such that all positions are perceived as comfortable.

The seat is also flexible and follows the movements of the pelvis, at the same time, the ergonomically shaped seat pan offers significant support. Together they encourage more movement. Furthermore, the seat can be moved both forward and backward to accommodate different leg lengths.

The flex element offers freedom of movement in all directions. It joins the backrest to the rest frame and allows the backrest to follow the user's spontaneous movements automatically and in all directions. The patented flex element facilitates a three-dimensional sitting experience and offers comfort and support in every situation.

The armrests support in every position and with every movement. Upon leaning back, the armrests move in sync and provide optimal support even in this position, e.g. when using mobile devices.

FORM AND FUNCTION

We've got your back – with soft upholstery

The se:flex offers all users an ergonomic sitting experience due to, in part, the comfortable mesh membrane in the backrest. This experience is further enhanced with the slimline yet soft upholstery which harmonises perfectly with the overall design. Furthermore, the mesh membrane and slim upholstery are available in a range of attractive colours to allow you to customise your se:flex.

Mesh membrane

Single-coloured

The light, transparent mesh membrane of the backrest is available in five different colours. The front and back differ only in terms of their structure.

Slim upholstery

Two-coloured

The colours and upholstery fabrics for the front can be individually selected from the entire Sedus fabric collection; the back is always in anthracite.

VISITOR CHAIR

Universal in application

Meeting rooms, lounge or waiting areas: The visitor chair brings lightness, can be excellently combined with other furniture and precisely meets the requirements placed on it. Just like the swivel chair, the se:flex visitor chair also conveys an ergonomic sitting experience: The seat surface enables optimum pressure distribution, the backrest is concave and has a lumbar support.

VISITOR CHAIR

Simply feel welcome

Due to its versatile design options, the se:flex visitor chair is universally and flexibly applicable. Depending on individual preferences, it is possible to choose between a four-leg chair and a cantilever chair, with or without armrests. Furthermore, there is a wide choice of frame colours, mesh membrane and slim upholstery. Regardless of which version of the visitor chair you choose: It welcomes everyone.

For space-saving storage, the four-leg chair is stackable up to five units. A transport trolley is also available as an option.

VARIATION AND DIVERSITY

All-round comfortable

With numerous combination options, the se:flex fulfills almost every wish: timeless and light as well as modern and chic. With exactly the colours and materials that fit best.

As diverse as its surroundings

A harmonious working environment contributes significantly to well-being and productivity. Well-conceived furnishings, pleasant fabric and material combinations as well as the choice of colour accents are key factors for achieving this goal. Whether Smart Balance, Soft Being, Urban Living or Multi Creation – the se:flex swivel and visitor chairs can easily be adapted to any of these colour schemes.

Do you need support in planning and implementation?

The experts from Sedus Workplace Consulting are looking forward to assisting you in designing your modern smart office. From analysing the floor plan and designing the concept to choosing the colour from the Sedus colour cookbook – everything comes from a single source.

Smart Balance

light, reduced, calm, structured, functional, technical

Urban Living

comfortable, respectable, elegant, urban, intense, timeless

Soft Being

gentle, calm, balanced, natural, inviting, regenerative

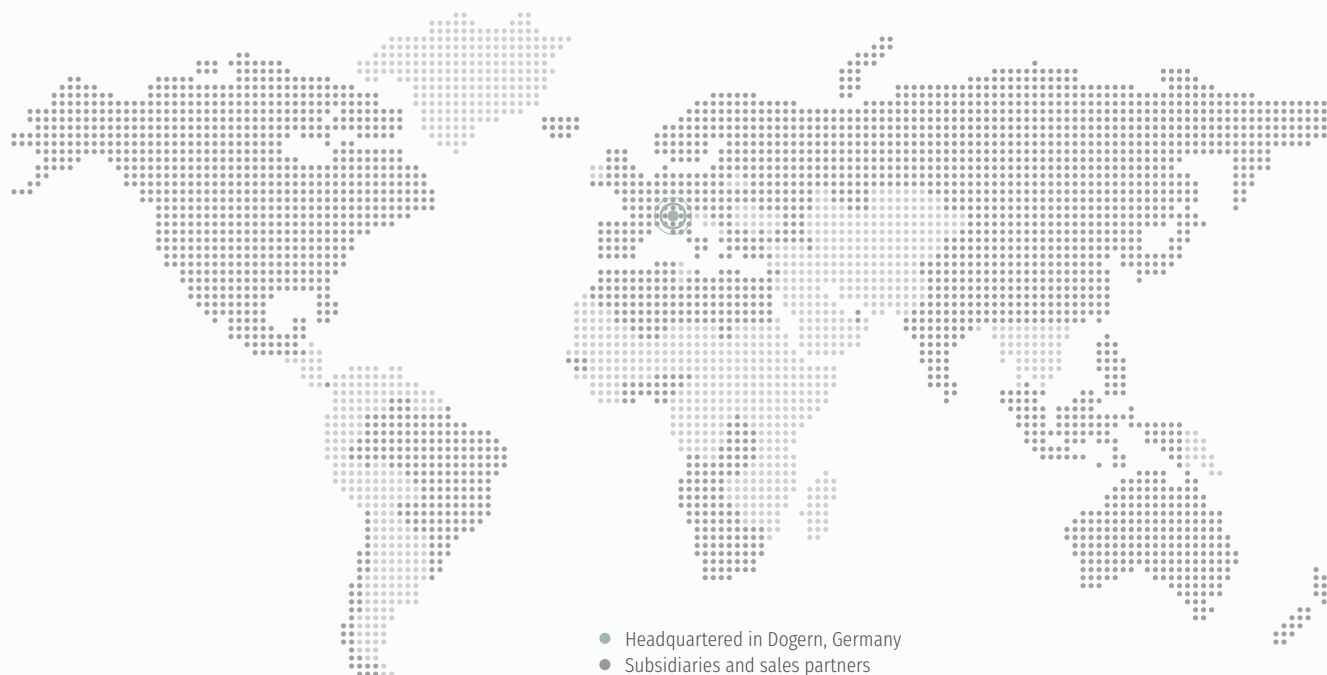

Multi creation

motivating, inspiring, creative, dynamic, active, open, free
