CONCERT Chair

Product sheet — 2026

+Halle®

CONCERT Chair is a wooden chair designed for spaces that bring people together. Its distinctive form is defined by a half-round profile that shapes the entire structure. When placed side by side, these profiles combine to form a complete circle using small magnets, creating the impression of a single shared leg. Arranged in rows, CONCERT Chairs create a calm and cohesive expression, making them particularly suited to conference rooms, auditoriums, educational settings, hospitality environments, and other gathering spaces. Like a good team member, the CONCERT Chair performs well on its own—and even better together. The chair is available with and without magnets.

Designed by Jamie Wolfond Studio

Jamie Wolfond is a Canadian designer. In 2013, he graduated from The Rhode Island School of Design with a BFA in Furniture Design. From 2014-2018, Wolfond ran a consumer brand called Good Thing. In 2018, he sold Good Thing and opened Jamie Wolfond Studio.

Jamie Wolfond Studio designs useful objects and creates artwork for brands, galleries and interior designers. While the studio works across many disciplines, every project is connected by a physical approach to research. Wolfond develops a design through a series of hand-made experiments, each one building on the knowledge gained from the experience of making the last. The results of Wolfond's process are objects which are simultaneously logical and unexpected, each one providing the narrative of its own creation.

Specifications

Materials:

Beech Veneer / Laminated Beech / Magnets (if selected) / Plastic gliders

Colour variants:

The CONCERT Chair is also available in custom RAL Classic colours (no minimum order).

Dimensions:

Height: 78,7cm / Length: 51,7cm / Width: 48cm / Seat Height: 46,3cm

Weight:

5,96 kg

Certifications:

EN — Report Number: 365957-7-NDS
BIFMA — Report Number: 365957-8-ANSI/BIFMA X5.4

Connection

The CONCERT Chair is available with or without magnets (for connecting the chairs).
Flexible magnets combine the chairs, when put in rows.
There is 2mm between the chairs (and the magnet is able to slightly move), which helps absorb tolerances and uneven flooring.
The chairs are combined with 3 magnets - one in the top backrest and one in each of the chair legs.

Stacking

The CONCERT chair stacks up to 6 chairs, when placed on the floor.
A trolley is launching in ultimo 2026, which allows for up to 12 chairs stacked.
